Course: BBL514E

Final Project Submission: What Makes a Movie Successful

General Info:

The report you are reading is split into 2 parts:

- Project Report: The IEEE conference style paper
- Presentation: The presentation prepared in pdf format.

You can find the dataset, the figures generated, this report, and the presentation in the following public Github repository.

You can find the video presentation of the project to watch online on Vimeo, or you can download it from google drive.

I hope you find the project and its outcomes as interesting as I did. I had quite an interesting time creating the project, and it posed a welcome challenge that I have not experienced before – and for that I thank you professor regardless of my final project grade.

Beyond the project grade I would greatly appreciate your feedback, both negative and positive.
